

Yeabsira Fikadu

Aspiring Software Engineer | Full-Stack Developer

Addis Ababa, Ethiopia | +251 94 816 8057 | yeabsira710@gmail.com | [Portfolio](#) | [GitHub](#)

Software Engineer passionate about building full-stack web applications with TypeScript, React, Next.js, and Node.js. Experienced in developing scalable applications using PostgreSQL, Prisma, Docker, and modern web technologies through academic and personal projects.

AREAS OF EXPERTISE

TypeScript · JavaScript · Python · Java · PHP · HTML/CSS · SQL · React · Next.js · Angular · Node.js · Express.js · Tailwind CSS · PostgreSQL · MySQL · MongoDB · Redis · Prisma ORM · Docker · RabbitMQ · WebSockets · Microservices · Git · Linux · WSL

PROJECTS

FilmLane | [Demo](#) | [GitHub](#) | React, TypeScript, Node.js, Express, PostgreSQL, Prisma

- Built a full-stack movie and TV discovery platform using React, Express, PostgreSQL, and Prisma with JWT authentication, personalized watchlists, and watch history.
- Integrated the TMDb API with an automatic OMDb fallback service to ensure uninterrupted access to movie and TV data during API failures or rate limits.
- Implemented server-side pagination, advanced filtering, and sorting while optimizing data retrieval through concurrent API requests.

StoreEase | [Demo](#) | [GitHub](#) | Next.js, React, TypeScript, Prisma, PostgreSQL

- Built a full-stack single-vendor e-commerce platform using Next.js, React, TypeScript, Prisma, and PostgreSQL with secure authentication, persistent shopping carts, and order management.
- Developed an admin dashboard to manage products, inventory, users, and order workflows, including automatic inventory updates after confirmed purchases.
- Integrated Cloudinary for image storage, Mailjet for transactional emails, and implemented product search, filtering, ratings, and responsive user interfaces with Tailwind CSS.

Distributed Game Server | [GitHub](#) | Node.js, WebSockets, RabbitMQ, Redis, MongoDB, PostgreSQL

- Built an event-driven multiplayer game backend using a microservices architecture with dedicated services for WebSocket communication, matchmaking, player management, and game logic.
- Implemented real-time communication with WebSockets, RabbitMQ, and Redis to support matchmaking, game state synchronization, player presence, and atomic state updates.
- Designed a scalable backend with JWT authentication, stateless services, Redis for active game state, and MongoDB for persistent match history and player statistics.

PROFESSIONAL EXPERIENCE

Efuye Gela | Full-Stack Developer Intern

Summer 2025

- Engineered a **full-stack URL shortener** platform featuring **advanced analytics**, **click tracking**, expiration handling, and customized user dashboards.
- Architected **scalable APIs** and optimized database performance leveraging **Next.js**, **TypeScript**, **Prisma**, and **PostgreSQL**.

Education

Addis Ababa Science and Technology University (AASTU)

Jun. 2021 – Sept. 2026

B.S. in Software Engineering

ACHIEVEMENTS & CERTIFICATIONS

National ID Hackathon Finalist | [Certificate](#) | Ethiopian Digital ID Program

2025

Python Teaching & Mentoring Certification | [Certificate](#) | SkillShare

2024
